

## Project

# ITP

## Architects

A229

## Address

Parc de Wisterzée, 1348 Court-St-Etienne

## Programme

Extension of a technical school by the addition of a sporthall, various workshops, classroom and an industrial kitchen.

## About

"The result of a public tender, the project is a successful example of responsible architecture in terms of energy consumption contrasting with the image of the traditional austere and purely functionalist school. The work illustrates the architectural potential of school architecture and public contracts. In the way it operates and the various functions it accommodates, the building creates high-quality spaces for learning, generating multiple spatial experiences. Through its form and clean language, it clarifies the organisation of the site and provides a strong image for the institute." text by Benjamin Pors for the NICHE A229-ITP feb-12 Bozar- Brussels

## Typology

Education

## Status

Built

## Conception

2006

## Delivery

2011
