Programme

Construction of a development of 25 sustainable and low-energy homes (20 public housing units and 5 housing units for middle- income families), road infrastructure and landscaping.

OTHER PROJECTS :

About

As the partner office of the 'building with energy' campaign, we have come up with a vision of the 'district' as an urbanised space with community facilities while reducing to a minimum its carbon footprint. The aim is to propose a new urban concept: with a greater emphasis on quality of life, solidarity and pleasant surroundings.

Middelweg

- Louvain-La-Neuve

We firmly believe that, to work, sustainable planning must also include a significant social dimension based on social diversity and personal responsibility.

In response to the demand of the client we have focused on what we believe to be the main challenge: we have taken our inspiration from the thinking and image of contemporary eco-districts while taking on board the reality and requirements specific to public housing (cost, maintenance and empowerment).

Typology

Housing (include mixed use)

Status

Ongoing building work
