Description

ATELIER PAYSAGE

ATELIER PAYSAGE is an agency of landscape architects that develops projects on multiple scales: gardens, squares, parks, districts and territories.

Around the themes of nature, architecture, mobility or conviviality, we build projects by crossing the views with our design partners, the contracting authorities and the users.

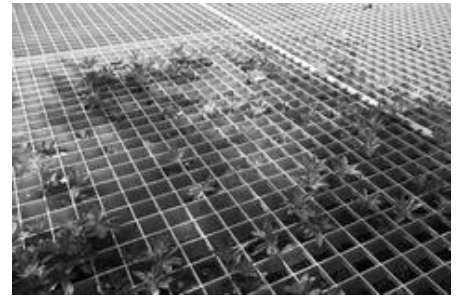

Our project approach is based on 3 axes: the consideration of the landscape as a living and dynamic base, its environmental role; its social role; and the identity through which it takes on meaning in the narrative of a collective history, its cultural role.

Creation

2008
