

Project

NURSERY IN FLÉMALLE

Architects

ARCHITECTURE NÉLIS DELINCÉ

Address

rue Houlbouse, 4400 Flémalle

Programme

Building of a 36-bed communal nursery

About

This new building is meant to be the starting point of the restructuring and renovation of the school site which will follow its construction.

A kind of game with intertwined colorful patterns covers the roof which is visible in the light of the landscape configuration. The envelope of the project stand as a "precint" in colored glazed bricks relating to the surrounding nature.

This texture intends to establish a link with the difficult area and ensure the building sustainability in time.

In addition to the fun side of the project for kids, workers and parents, this public building will bring a breath of freshness and vitality to the neighborhood and its future development.

The main building is a wooden frame filled with an overall cellulose insulation.
