Address

Sart Tilman, Quartier Agora, Boulevard du Rectorat 1, 4000 Liège

Thier des Critchons 18
4032 Chênée (Liège)

Programme

Construction of the reception pavilion of the University of Liège

Tél : +32 42 22 21 32

About

A study was conducted on the Sart-Tilman site to determine the needs of the University of Liège. Subsequently, a competition was launched for the construction of a cafeteria, the extension of the faculty of civil engineering and the construction of a reception building: the North Zone connection.

OTHER PROJECTS :

At the scale of the site, the building is particularly modest. It contains only a reception area, a workspace and an auditorium. Its strategic role is not only to be a « letter box ». It acts as a landmark for all those who arrive on the site.

Castle of Chevetogne
- 2010 2016
- Chevetogne

The aim is to combine openness, relationship to the outside world, dialogue and a strong signal. Its size allows it to be clearly visible from all access points to the traffic circle. On the traffic circle side, it is closed and compact. On the other side, it is open towards the promenade, the trees and the sun. The absence of a main façade reinforces its visibility as an object.

School in Noiseux
- 2011 2016
- Somme-Leuze

When night falls, the reception building becomes a «lantern». The ceramic façade material plays an important role in the perception. It expresses the vision of an architecture that is both eminently contemporary and environmentally respectful.

House in Remicourt
- 2012 2015
- Remicourt

Community hall in Ellemelle
- 2016 2021
- Ouffet
