Project	# COMMUNITY HALL IN ELLEMELLE
Architects	ATELIER CHORA
Address	Rue du Village 3, 4590 Ouffet
Programe	Construction of a community hall in Ouffet. (Terrace, entrance hall, meeting room, multi-purpose room, equipment room, cloakrooms, storage rooms, bar, back bar, kitchen, scullery, backstage, surroundings)
About	The project is an allegory of a slight deformation of the landscape; a jutting out of a slope; the continuity of a tension line; a row of stones in the pond... The volumetry advances on the pond and leans against the slope of the meadow to free a vast space open on the street and the village. The project proposes the creation of an unbreakable link between the horizontal roof and the vibration of the water. This one, surmounting massive masonry anchored to the ground, is deposited on some posts. Between reflections and transparencies, the volumetry wants to be light as a line in the landscape. The link established with the pond is both physical and historical. Indeed, it is the only remaining pond in the town. It still has its initial function of collecting rainwater, but also as a watering place for farm animals. The project is connected to the landscape and the village by the opening towards the courtyard and the street. From the street, this opening allows a continuous reading of the activities that develop in the room. It is a place for meetings, for sharing and a landmark.
Typology	Civic and community
Status	Built
Conception	2016
Delivery	2021
Client	Commune d'Ouffet
Total budget	793 451 ?
Per square meters	/
Area	370
