

## Architects

## Description

# BINARIO ARCHITECTES

The Binario architects office was founded in 2010 and is the culmination of a long collaboration between architects Delphine Péters and Andrea Tenuta. Andrea Tenuta graduated from IUAV in Venice in 2001. Delphine Péters graduated from ISA Saint-Luc in Liège in 2000 and obtained a Master of Conservation of Monuments and Sites from KU Leuven in 2002. They are laureates of several competitions dealing with various themes such as restoration and rehabilitation of patrimonial heritage, educational infrastructure and collective housing. Their identity stems from their complementarity and from the exchanges they like to nurture with other disciplines such as urban planning, landscape and scenography as well as collaborating with passionate artisans and craftsmen. They are particularly interested in the collective experience of architecture in its creative, cultural and societal dimensions.
