# BUREAU D'ARCHITECTES EMMANUEL BOUFFIOUX SPRL

Rue de Koninck 40  
1080 Bruxelles

## Description

Founded in 1998 by architect Emmanuel Bouffieux the studio works on a variety of projects which cover all types of programme, such as the building of single family dwellings, housing unit complexes, office space, and buildings meant for public use, either being new constructions or renovations. The multidisciplinary nature of the team which makes up our bureau allows us to approach each and every project with enthusiasm and innovative creativity.

The bureau is staffed by eight building specialists who have acquired an in-depth knowledge of architecture. Their work is influenced by extensive experience and a desire for perfection. Our team is mostly made up of architects and building technicians. The practical experience acquired over the past several years, along with the high quality of services offered by the members on our team, allow us to offer an innovative solution for each project, which, technically speaking, is always successfully completed. Such solutions are hallmarks of contemporary architecture which place people and their needs at the center of the creative building process.

Every new project is an opportunity to search for a synthesis which integrates economic, environmental, technical, and aesthetic responses to the issues that each client's request entails. In order to carry out the integration of the project within its context, each project is analysed, based on its cultural aspects and in relation to its location in space and time.
