

## Architects

## Description

# CLERBAUX PINON

CLERBAUX-PINON architects, town planners is an architects and urban planners firm who has more than 25 years experience. Sharing its premises and staff with the firm « Aménagement sc », specialized in town and country planning, these two firms form together the « AcpGroup », thus possessing a transversal expertise of the art of building.

For the architectural part, the activities are related to new buildings and to renovation, as well for buildings as for public areas, for complete projects or just for feasibility studies.

For the urban and country planning part, the activities are related to the elaboration of plans and reflexions at different levels (local, regional, international), in mobility studies and in environmental impact studies.

Its clients belong to the private sector (promoters, private persons) and to the public sector (municipalities, regions, Belgian Federal State, large public companies such as the railways). Although the activities were mainly centred on Belgium, AcpGroup starts opening up to export markets (Middle East, China).

Its professional approach is based on 3 commitments to which partners and staff must subscribe: ethical quality meaning respect of the client and of the common good, intellectual quality meaning great creativity and technical precision, and a perfect consent with the principles and behaviour that are characteristic of sustainable development.

Caussée de La Hulpe, 177/5  
1170 Bruxelles
