### Description

# ETAU ARCHITECTS

Established since 1970, ETAU ARCHITECTS is an architectural office experienced in design and management of sizeable projects, both in public and private markets. Its activities cover all areas of architecture: Health care, housing, offices, community facilities and urban development. Most of our activities are intended for medical institutions and for the elderly. With the construction of more than 3,000 nursing home beds and 240 units of assisted living residences, ETAU is recognized for its expertise in this sector.

Our architectural designs, contemporary and qualitative, fit harmoniously in their urban environment and social environment. Our goal is to achieve sustainable economic structures, simple and effective, in a global and timeless approach.

Our team, multidisciplinary, enthusiastic and experienced, put its imagination and expertise to offer you the best quality of services.
