

Project

PROJET GIGA SPI

Architects

GÉRARD-LEMAIRE & ASSOCIÉS

Address

Avenue de l'Hôpital, 4000 Liège

Programme

? 18 multi-purpose adjustable units (5 x 10m) with possibility of grouping up to 6 cells (300 m² of surface area)
 ? 1 white room (maybe 2)
 ? Refurbishment of the rest area on the corner with a patio on the South and a view towards the CHU
 ? Central sanitary facilities (accessibility)
 ? Reception office and meeting zones near the lobby around the vertical circulations
 ? Main technical zones at the -1 and the +3 levels

About

Construction of a business incubator in the biotechnologies field, with provision of a white room fully equipped, fitted laboratories, and offices for young companies and active spin-off in the biotechnologies field. The construction programme required a prospective image, evoking the companies' activity and dynamism. From this wish is born a compact and dynamic volume, presenting slightly curved wooden facades, perched on pillars to maintain the parking under the building.

For us, this volumetry evokes a « nest ». The facades' curves evoke the tension preceding the « eclosion » of the volume opening to the North-West to create an access from the street of the hospital.

The choice of a cladding made entirely of wood (facades and roofing) reinforce the link with the natural environment. This sustainable material, that doesn't need any maintenance, once given a patina, will fit with the tones of the CHU's concrete tours.

Project funded by FEDER subsidies.

Typology

Scientific research laboratory

Status

Built

Conception

2009

Delivery

2011

Client

SPI - Rue du Vertbois 11 à 4000 LIEGE
