

## Architects

## Description

# MICHÈLE VERHELST ARCHITECT

Michèle Verhelst, involved in many construction projects both in Brussels and Wallonia since 2007.  
Turned to a contemporary architecture, Michèle Verhelst is surrounded by freelancers to implement its projects and bringing new blood into his creations.

The philosophy of Michèle Verhelst based on five conductive lines:

EXPLOIT the basic vocabulary of architecture since the operation of the building must be clear and prioritization of natural areas.

Project ACHIEVE in perfect harmony with the environment and the rhythms and modes of life of its inhabitants.

PLAY with the structure because the structure IS architecture.

CHOOSE materials that reflect the architectural intentions primary and "soften" them to make the space livable.

FOLLOW budgets throughout the project's development.

## Creation

2007
