## Description

# NEY & PARTNERS

Ney & Partners is a structural engineering consultancy, established in Brussels. Since its founding in 1996, the office has worked with an active view on the art of engineering through the integration of the different civil works disciplines. This integration and optimisation of structural elements aims to overcome the classic hierarchic assembly of constructive solutions. Innovative footbridges, road bridges, roof structures and works of art developed by our office, express most clearly this vision. In our collaborations with architects, engineers or artists we aim at a full integration of architecture, structure and context.

## Creation

1996
