SKOPE - ARCHITECTURE - CITY PLANNING - LANDSCAPE DESIGN

Description

SKOPE is a limited responsibilities cooperative agency was created in 2013 with the intention ? lead by its founders ? of developing an active agency in a transversal manner in the architecture, urbanism and landscape architecture professions. SKOPE relies particularly on the multidisciplinary quality of its team in order to offer its clients, in the public and private sector, an answer integrating each time the new complexities of the city and the territories. To each project comes an original architectural and urban vision in order to answer to the needs of a renovation or a restoration of the built and non-built heritage.

Our global approach translates itself on a daily basis through the mindfulness given to our work and projects in order to integrate the Man in all its dimensions and evolutions. This humanist approach also translates itself through the dynamic and the willingness of our colleagues to always do better and go beyond their initial aspirations in order to meet the needs of today and tomorrow. It is the ensemble of the internal and diverse skills of our team that allows us to offer those services. We pay a particular attention to the training quality of everyone as well as the exchange and sharing of information. In doing so, we can answer the most complex questions and aspirations of our clients, with flexibility, creativity and rigor.

Your aspirations become our challenges!
