Architects

SUMPROJECT

Description

SumProject is an architectural and urban development office which places the human being and its living environment at the heart of its work. Since more than 40 years SumProject offers creative solutions to social, spatial and environmental issues by drawing up smart projects for the city and its inhabitants.
As such SumProject combines a rich cross-disciplinary work experience with a continuously renewed creative process in order to bring sustainable and innovative solutions to each mission.
The company has a policy of continuous quality improvement of its services, in particular through a strict management of the budgets, deadlines and processes of the missions entrusted in it. To this end, Sum has been ISO 9001 certified since 2000.

Sum is a living laboratory of about fifty people from various backgrounds (architects, economists, town planners, engineers, sociologists, geographers, historians, designers, heritage specialists, environmental and mobility experts, etc.). For each project, SumProject provides a dedicated team fully in line with the specific requirements of the client.
