

VERS PLUS DE BIEN-ÊTRE V+

Architects

Description

Our fundamental beliefs, philosophy and hopes are contained in this name.

We believe that architecture is not a question of square meters or provision of services. It is first and foremost a political stance, a cultural act, a poem of centimetres, a social statement, a philosophical surprise, a desire for space, a source of dreams...

...And above all about more life, more passion, more attitude, more joy, more smiles, more questions, more intensity, more assertions, more fantasies, more euphoria, more effervescence, more movement, more resistance, more instinct, more desires, more character, more will, more demands, more eagerness, more spirit, more sparkle, more freshness, more fulfillment, more vivacity, more conviction, more pride, more generosity, more love, more temerity, more audacity, more delight, more playfulness, more infatuation, more challenge, more sensuality, more fascination and more inspiration.

Creation

1998

Associates

Jörn Bihaïn
Thierry Decuyper
