

## Project

# JONQUILLES HOUSE

## Architects

BRUUM ARCHITECTURE

## Address

Rue des Jonquilles 10, 4000 Liège

## Programme

Studio + logement 2 chambres

## About

The project consists of a studio (40m<sup>2</sup>) and a duplex apartment (85m<sup>2</sup>) located in an old hollow tooth of a staircase street named Jonquilles. Conceived as the extension of a course starting at the foot of this street and ending on a roof terrace, it puts the inhabitant in permanent contact with its place. The project was also shaped around the strong constraints specific to the site : narrowness of the plot (less than 5 meters), sloping ground in a south-facing staircase street, difficulties in supplying the site. These constraints have guided the spatial but also technical choices : light and small materials, minimal excavation... all largely realized with man hands.

The facade is characterized by a set of sliding shutters (wooden slats), present on all floors. These shutters designed for climatic reasons allow the inhabitant to transform his daily relationship to the street. The main metal frame that divides the façade is part of the general typology of adjacent facades? drawings (brick lines, general levels of templates, scale) and masks, in this apparent simplicity, interior spaces? complexities.

The entire design offers a great deal of internal spatial diversity, multiple differentiated views of the environment, the possibility of transforming the relationship to the outside and many outdoor spaces of different qualities, thus meeting the multiple and varied needs of humans and families.

## Typology

Private houses

## Status

Built

## Conception

2011

## Delivery

2016

## Area

125

## Stability
