Programme

Home neighborhood with a school homework, a party room, associative and local building 3 passive housing

OTHER PROJECTS :

About

The new house Saint-Antoine (MQSA) is in the context of a conceptual design which was developed in a participatory process. We opted for an organization of the program to interact with the urban context on three sides of the plot.

24 housing "low energy"
- 2009
- Eghezée

We propose to create a new building at the corner of the streets, at the opposite to the existing building which currently houses the Maison de Quartier (MQSA) end of a template 4 levels (ground floor + 3 floors).

Building of 4 housing "low energy"
- 2009 2011
- Bruxelles

Volume binding levels to build along the street Padua ensure the transition between the new construction and building renovation.

Low energy House - K29
- 2009 2011
- Rhode-Saint-Genèse

We suggest moving the main entrance of the MQSA Fierlant street to street Padua to take advantage of existing public space. We maintain a secondary entrance street Fierlant to allow greater flexibility while maintaining a certain activity on the street.

Eco-renovation of a building of social housing
- 2010 2012
- Liège
