

Architects

Description

HE-ARCHITECTES

The office "he-architectes" is active in both private and public projects (new housing and renovation/extension, shops, services, heritages, public infrastructure, ...).

The proposed architecture is the result of a research and composition many times questioned, focusing on use values and asking a certain rigor in its both functional and constructive resolution.

The design follows the project until its construction by avoiding hiding itself behind a rigid speech which would leave no place in the process.

It's marked by interest in the matter, powered by meetings with the professionals.

It definitely is an architecture to live.

Creation

2010

Associates

Bertrand EVRATS, architecte gérant
