

## Project

# CANS

## Architects

ICI ARCHITECTES

## Address

rue cans 10, 1050 Bruxelles

## Programme

Two new duplex in a typical Brussels house

## About

In a very densely populated island near the lively Place Fernand Coq, a typical Brussels house is grafted onto the rear facade of a rectangular parallelepiped.

The transformation and extension of this former apartment building into an island interior makes it possible to increase the surface area and improve the quality of the four apartments while offering a diversity of typologies and preserving the intrinsic qualities of the front building.
