About

Project delivered for a loft in a clustered habitat in collaboration with Ines Camacho.
Refurbishment of an old Theater divided into 4 units.
This unit includes a studio, 4 bedrooms and a music room. A new top level is added like a suspended house of sorts, including 2 bedrooms for the children. From this level they will have access to a suspended net acting as a play and relaxation area above the middle level, which houses mainly common shared activities, and communicates with the ground level.
