## VAN DER PLANCKE ARCHITECTE S.R.L.

03/9, Avenue des Gaulois  
1040 BRUXELLES (Etterbeek)

---

Description

Located in the heart of Brussels, the VAA ARCHITECTURE workshop is an office on a human scale driven by creativity, rigour and refinement.

Enriched by several years of experience, the VAA ARCHITECTURE workshop now has unique and prestigious achievements to its credit in Belgium but also in the rest of Europe.

By proposing tailor-made projects, from the first draft to the final details, and by surrounding itself with the best craftsmen, the architecture workshop applies its expertise and inventiveness to meet the client's wishes as closely as possible. The studio designs housing, offices, public facilities and urban development. They build, renovate, restore, transform and elevate. They develop projects from the initial stage of the preliminary study to the final acceptance of the works.

The passion, technicality and tenacity with which the architectural studio approaches each project are the principles that today give it a singular place in the profession.
