

VIDEO: ESTATE ESTATE - CHAPON & MATIGNON

WBA is continuing its collaboration with Jonathan Ortegat - an architectural video-maker and photographer - to promote the architecture of Wallonie-Bruxelles Architectures internationally. The aim of the video clips produced is to showcase contemporary projects built by FWB architects on an international scale.

This time we invite you to discover two projects built in France by the Brussels office Estate Estate:

Chapon: Located in the heart of the Marais district in Paris, this renovation of a commercial ground floor is a new physical showcase for Arts Dessinés, a magazine dedicated to drawings from all horizons (press cartoonists, illustrators, comic strip authors, painters, etc.). The project involves bringing together two exhibition areas and an office on an 80m² platform. The coherence of this compartmentalised space was achieved by working identically on each piece of furniture needed to run the gallery.

Matignon: Interior design for an art gallery on Avenue Matignon in Paris. The project is based on the design of pieces of furniture with common characteristics that allow you to move from one to the other: each element is visually associated to the next. An analysis of the gallery led to the final composition of 12 elements.

To produce this video, Jonathan Ortegat called on a team comprising Jeanne Debarsy for the sound, Loup Mormont for the music, Jean Forest for the graphics and Lucien Keller for the colourimetry.
