

GUIDE OF MODERN AND CONTEMPORARY ARCHITECTURE

This fifth guide to modern and contemporary architecture devoted to the provinces of Namur & Luxembourg invites you to look at architecture differently, through a selection of four hundred and fifty-two projects located on maps, commented on by more than fifty authors, illustrated by nearly a thousand photographs and six hundred maps. These projects are the fruit of modernity revisited in each era by architects, from Art Nouveau to the present day: modest programmes or large-scale realisations, private commissions and public buildings. This volume is produced in partnership with the Faculty of Architecture, Architectural Engineering, Urban Planning LOCI of UCLouvain and the Faculty of Philosophy and Letters of UNamur (PaTHs), under the supervision of Jean-Paul Verleyen and Cécile Vandernoot. Nicolas Bomal is the author of the photographic commission.
