## INVENTORIES#3 IN RENNES - IN PICTURES

Wallonie-Bruxelles Architectures is organising the presentation of the book and the exhibition Inventories#3 in the framework of the Inter-World Meeting on New Ways of Doing Architecture which will take place on 23 and 24 September 2021.

The aim of these meetings is to bring together at the same table all the small and large worlds that make up the world of construction and development in a context that is conducive to meeting, sharing knowledge and questions, and developing a common language and a coherent and accurate vision of the major issues of the future.

On the theme of atmosphere(s), the RIM 2021 will invite its participants to live the atmosphere as much as to think about it in order to refine, with crossed views and shared experiences, the tools for its measurement and its possible transformation.

With Julien Dailly, Gilles Debrun and Pauline de la Boulaye. <br class="innova">
