NEY&PARTNERS WINS THE NORWEGIAN TOURIST BOARD'S 2022 ENVIRONMENTAL PRIZE

The Norwegian Tourist Board's 2022 Environmental Prize was awarded to a design by Ney & Partners. Hovering trails is, a collaboration with Alternance Architecture and concerns a series of floating self-supporting aluminum footpaths that protect the sensitive hot springs area at Skikållon in Hveradalir with minimal contact points on the ground. This popular tourist destination needed to be protected and accessibility increased. The design is a 1.5m path that transists into 3 m platforms and can be applied to natural or archaeological sensitive sites. Lighting and handrails are integrated into the design. The Norwegian award is intended to encourage environmental care when planning and developing tourist areas.
