## VERS.A: FRAGMENT

---

The VERS.A office was founded in 2011 by Belgian architects Guillaume Becker and Kobe Van Praet. Their production ranges from private homes to public buildings.

Fragment traces the production of the office through a sampling of documents illustrating the practice and the concerns of the office (sketches, plans, models, execution documents, photographs). The book is articulated in 3 parts accompanied by contributions bringing an external lighting on the production and the approach of the office.
