

## XX MODELS YOUNG BELGIAN ARCHITECTURE

This book presents 20 recent projects by 20 young Belgian architectural firms through 20 architectural models.

In an aim to offer young talent a stage, A+ Belgian Architectural Review and Bozar Architecture invited, every two months from September 2008 onwards, a young architectural firm to take part in the Niche series. Each firm was to present one of their early large-scale projects during a talk, and the relevant model would then be displayed, for the rest of the season, at the Centre for Fine Arts in Brussels. The exhibition XX Models Young Belgian Architecture gathers all 20 models.

The book will be presented on the Belgian Pavillon at the Shenzhen Biennale of Architecture and Urbanism in decembre 2013.
