## OPEN CALL: BUILDING FOR THE PRAGUE EMERGENCY MEDICAL SERVICE

---

The subject of the competition is a new administrative and technical building of the ZZS as the main headquarters of the Prague Emergency Medical Service. Its layout and architectural design should respond to the complexity and difficulty of the operation, but also to the comfort of users who are exposed to excessively stressful situations during their work.

The focal point of the building is the Medical Operations Centre (ZOS) - dispatching centre, where the ZOS staff receive calls and deal with crisis situations. The ZOS is complemented by other facilities such as an education and training centre with facilities for training rescuers and the public, servicing and cleaning of ambulances and other rescue equipment, or administrative facilities for the entire Prague Emergency Medical Service.
