

CITIES CONNECTION PROJECT CCP06 WALLONIE-BRUXELLES | BASEL | BARCELONA 2ND EVENT

BASEL 13.05-14.05 '22

ARCHITECTURE WEEK

BASEL IS RECOGNIZED AS SWITZERLAND'S ARCHITECTURAL CAPITAL. HARDLY ANY OTHER REGION IS HOME TO SO MANY INTERNATIONALLY ACTIVE ARCHITECTURAL OFFICES. IN ORDER TO SHOWCASE THE HIGHLY DIVERSE POTENTIAL OF BUILDING CULTURE, EXPERTISE AND ENTHUSIASM IN THE CITY AND SURROUNDING AREA, ARCHITEKTUR DIALOGUE BASEL FOUNDATION IS NOW INITIATING A NEW BIENNIAL PLATFORM FOR ARCHITECTURE AND URBAN DEVELOPMENT: **ARCHITEKTURWOCHE BASEL - AWB**. THE FIRST EDITION WILL BE HELD FROM 9-15 MAY '22

THEME AWB '22

REAL RÄUME - REAL SPACES

In the Forum, various aspects of three current development sites in Basel are assessed: Dreispitz (Münchenstein), Bachgraben (Allschwil) and Klybeck. The dialogue will reflect on the planned changes and identify the main protagonists influencing the process of transformation. The second format is the temporary Basel Pavillon developed in a design competition, which demonstrates new processes for climate-friendly construction from (re)used building components. It was initiated by the Architektur Basel collective with support from the Christoph Merian Foundation, which is providing the building site on the southern part of the Dreispitz area. The AWB Award promotes visionary uses of public space in order to open new perspectives on the city. The AWB programme is complemented with collateral events such as lectures, guided tours, workshops, exhibitions, film screenings, concerts and performances organized by partners in Basel-Stadt, Basel-Landschaft and neighbouring regions of France and Germany: architecture, engineering and planning offices are invited to participate in the Open Office event and give the public an insight into their work on two afternoons. In addition, local institutions and organizations can become part of the first Architekturwoche Basel by hosting their own event.
